BACKGROUND

New technologies have had unprecedented impacts on industries and, of course, on the performance of professionals. Given this context, the Sesi Longevity and Productivity Innovation Center, with the technical cooperation of the Sistema Fiep Observatory, prepared a study that systematizes the skills for the nine technological pillars of industry 4.0.

EVENT OBJECTIVES

The webinar aims to present the publication Skills 4.0 to exchange knowledge around the 9 technological pillars for industry

CONTENT AND STRUCTURE

The event consists of a presentation of the new publication developed by Sistema Fiep.

TARGETED AUDIENCE

Open to public
